DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a printing unit comprising a printing area-like portion with a plurality of ink supply members, a plurality of detecting systems, and a control system to control the plurality of ink supply members, classified in class 347, subclass 87.
 - II. Claims 10-16, drawn to a manufacturing line for manufacturing an organicEL display, classified in class 313, subclass 505.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated due to invention II dealing with an EL display.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
